AN IMPORTANT NOTE TO MAIL BIDDERS

If you are submitting mail bids, you may have some questions regarding how we execute your bids. When we receive mail bid sheets, they are sequentially assigned bidder numbers. The bids on each sheet are then transferred into a master bid book for the auction. For example, let's say we receive your bids and assign you bidder #749. We would then post your bids into the master book as shown in the diagram below.

Your bid sheet:

Bidder #749	
Lot	Amount
658	$1,000
659	$550

Our master bid book:

				Opening Bid
Lot 658	$250 641	$500 1078	$1,000 749	$550
Lot 659	$250 868	$450 945	$550 749	$475

the amount you bid
your bidder number

Just before the auction starts, based on the mail bids submitted, we record what the opening bid will be on each lot in the column marked "opening bid" (as shown above). This opening bid is determined by increasing the second highest bid received on a given lot by 5-10%. For example, we received mail bids of $250, $500, & $1,000 for Lot 658. The second highest bid (i.e. $500) increased by 5-10% is $550. Therefore, $550 is the figure recorded in the "opening bid" column. Now, if there is no floor activity on the lot, you (as bidder #759) are awarded the lot at $550. If there is floor activity on the lot, we will act as your agent and bid competitively for you. If the amount you bid is not exceeded by a buyer on the floor, you will be awarded the lot at wherever the bidding stopped.

It is important to emphasize that the bid you submit on a lot should always be the absolute maximum that you would be willing to pay for that lot. Following the above procedure, we will always try to obtain the lot for you as inexpensively as possible; you will not necessarily have to pay the full amount of your bid. As a matter of fact, nearly 70% of our mail bidders are awarded their successful purchases at less than their top bids. All of our auctions are unreserved, too. This means we do not allow reserve bids, and every coin in our sales is sold to the highest bidder.

New England Rare Coin Auctions offers many special services for its mail bidders. Our Exhibition Service offers you the opportunity to personally view the lots before placing your bids. Our Personal Bidding Service offers you your own personal agent at our auctions. (Further information on both these services is in the front section of this catalog.) We also allow you to limit the total amount of your purchases (just fill in the proper area on your mail bid form). This way you can submit more bids, greatly increasing your chances of successfully obtaining one or two coins of your choice without overextending your budget.

Before you enter your bids, please be sure to read the TERMS OF SALE very carefully. If you have any questions at all about bids you wish to submit, please call our toll free number 1-800-225-6794, Ext. 99. We appreciate your participation in this and future sales.

TERMS AND CONDITIONS OF SALE

I. BIDDING – Each lot will be sold to the highest bidder UNRESERVED at a slight advance over the next highest bid. In the event of floor disputes, the auctioneer's determination shall be final. All bids are to be per lot; no lots will be broken. We reserve the right to reject any bid that we believe has not been submitted in good faith.

II. MAIL BIDDERS – No commission will be charged for executing mail bids. When a mail bidder submits the high bid on a lot, he will be awarded the lot at a nominal 5 to 10% advance over the second highest bid. (For further explanation, see An Important Note to Mail Bidders, pg. iii). In the event of tie winning mail bids, the first bid received will be awarded the lot. Bids are accepted in whole dollars only. All others will be rounded to the nearest dollar. No unlimited or "buy" bids will be accepted. All bid sheets must be signed; company bids must be submitted with a personal signature. We cannot assume responsibility for any errors made as to lot numbers or amount on mail bid sheets, so check your bid sheet carefully.

III. ESTABLISHING CREDIT TO BID – Bidders who have not established credit must furnish satisfactory references or send a deposit of 25% of the total amount of their bids. Deposits are applicable to purchases; unused portions will be promptly refunded after the sale. No deposit is required for bids totaling less than $100. Establishing credit to bid is used to show the good faith of the bidder and does not establish a shipment before payment account.

IV. PAYMENT – Terms of this sale are strictly CASH with PAYMENT in U.S. funds DUE IMMEDIATELY upon receipt of invoice. All late remittances will be subject to interest charges. Lots delivered in Massachusetts are subject to State Sales Tax of 5%. Postage and insurance costs will be added on lots shipped. We reserve the right to obtain payment in full before delivery of lots. Title does not pass until lots are paid for in full.

V. AUTHENTICITY – All lots are guaranteed genuine. Requests to return coins must be made in writing within 3 days of receipt of the coins. Late remittance for purchases, however, is cause to negate this privilege. (No lots may be returned afterAugust 21 except for reasons of authenticity.) No lots purchased by floor bidders may be returned. The return lot must be intact in its original holder. AUCTION SALES ARE NOT APPROVAL SALES.

VI. The placing of any bid in this sale constitutes acceptance of the foregoing terms and conditions.

All photographs depict the actual lots being sold. Every attempt has been made to illustrate the lot as it appears to the naked eye.

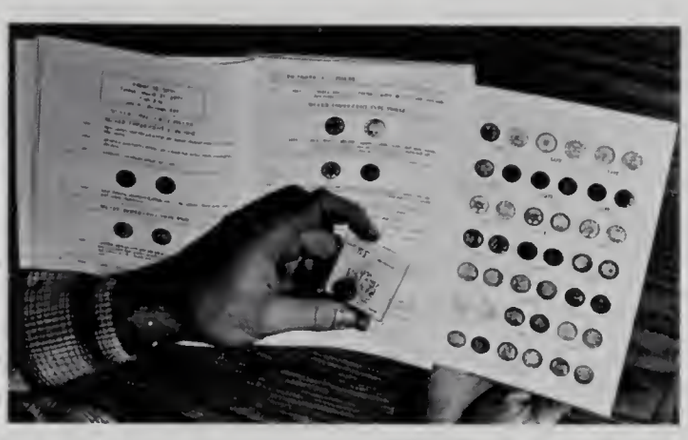
A NEW "TIP" FROM NEW ENGLAND RARE COIN AUCTIONS. . .



We are quite proud of our latest innovation to our already outstanding auction catalogs – our tip-out pages.

The philosophy at New England has always been that a description of a lot and its photograph should be inseparable. Our reasons are obvious – this is the best way to make your bidding as easy as possible. Mail bidders have the advantage of a catalog that contains the obverse *and* the reverse photographs of a lot right near the description of that lot, which is the best way for them to "see" each coin as if they were examining it themselves. Floor bidders have the advantage of being able to read a description, then make their own notes right next to the photograph of that lot. And at the auction, a bidder that has a catalog which has the photograph near the description can easily recall a lot as it is about to be sold.

But, we also realized that many more coins needed to be photographed and that the "highlight" coins of the sale deserved to be in color. Therefore, we created our tip-out plate pages.

If you've only quickly glanced at our new tip-out pages, you'd get the impression that we've abandoned our philosophy. But look closer – unfold the first black and white tip-out photo page and *leave it open.* Now start reading the first few lots in the catalog and go all the way up to the last lot shown on the plate page. Every time a description ends with (PHOTO), refer to the tip-out page. You'll see that you still have the photograph right near the description even though you are turning several pages of text! We've created a method to satisfy our philosophy in rare coin cataloging while continuing to supply a clear and concise catalog.

When you flip the plate page over to the other side you can examine the highlight coins of the auction in color. This latest addition to our catalogs will prove to be helpful when making your bidding selections.

We welcome your comments on our new tip-out pages. Write or call us on our toll free WATS line. We'll be interested to learn what you think!

QUANTITATIVE GRADING SYSTEM

At New England Rare Coin Auctions we use the same grading system as our parent company, New England Rare Coin Galleries. We feel that this system provides a more precise method of helping the bidder to better ascertain the exact condition of those lots in which he has an interest. Our quantitative grading system is basically patterned after Dr. Sheldon's quantitative scale which he developed to grade Large Cents. His system has been almost universally adopted in recent years and is now used to describe all denominations and series from Colonials to Pioneer Gold. The numbers used in this grading system are as follows:

Poor	1
Fair	2
About Good	3
Good	4-6
Very Good	8-10
Fine	12-15
Very Fine	20-25-30-35
Extremely Fine	40-45
Almost Uncirculated	50-55
Uncirculated	60-65-70

As an example of how this works, a coin which just meets the minimum requirements for Very Fine would be graded Very Fine–20. A slightly better piece would be graded Very Fine–25. A coin which would previously be graded as Very Fine to Extremely Fine would be a Very Fine–30 while a coin that falls short of the Extremely Fine grade would be graded a Very Fine–35. This grading system has been used mainly on U. S. coins only. Conventional grading has been used for the most part on foreign coins and currency.

However, far more important than the actual system is the accuracy with which the system is employed. Coins are not only graded with exceptional accuracy, but are described with regard to depth of strike, defects, color, lustre, and other important factors. The result is accurate grading: best for the seller – best for the buyer.

Our Personal Bidding Service

It lets you bid as if you're at the auction

Now you have a choice. If you're unable to attend a New England Rare Coin Auction sale, you can bid by mail *or* let a qualified auction-bidder representative do the bidding for you *in person.*

Here's how it works: On the next pages, you'll find the names of several qualified auction bidder-representatives who will be attending all 1978 New England Rare Coin auctions and who have agreed to execute bids for a nominal commission. Choose the one you'd like to have represent you and he'll do the following as your personal bidder:

1. He will examine the lots you wish to bid on and determine their suitability for your collection according to your standards.
2. He will give you complete bidding advice.
3. He will execute your bid up to the amount you and he have previously agreed upon.
4. He will be able to execute your second choice bids if you are unsuccessful on some lots.
5. He will do all of these for a nominal fee based on the actual price you pay for the coin (usually 5%). You pay nothing if you are an unsuccessful bidder.

It's easy to participate in a New England Rare Coin auction.

Dear Fellow Numismatists:

We are pleased to present the comprehensive A.J. Amato Collection, spanning U.S. coinage, Colonial coinage, Foreign coins, and U.S. currency. More than fifty years ago, Mr. Amato began collecting coins under the guidance of his collector father. As his collecting horizons widened, he expanded his interests to include late 19th and 20th century coinage. Although for this Sale whole series of U.S. coins have been compiled from various consignors, Mr. Amato's collection concentrates on the key dates and better quality material.

While the Amato Collection spans nearly every U.S. series, of particular note is the U.S. gold coinage. Many outstanding examples of early U.S. gold are offered, with many types represented in Gem Uncirculated condition. Foreign coinage is also well represented with samples from his collection (the remainder of his collection of Foreign and U.S. coinage will be offered in our November sale.)

With this catalog, our tip-out pages have been expanded to illustrate coins in color. The six color tip-out pages highlight some of the approximately 1700 lots offered. We hope you find this, plus our expanded black and white photography, helpful in making your bidding selections.

Finally, I'd like to welcome Peter Boyer (Coins of the Realm, Baltimore, Maryland) and Tony Calcagno (San Francisco, California) as Bidder-Representatives. With these additions, our Bidder-Representative service has expanded to include virtually every section of the United States. In addition to our usual pre-auction exhibition services, we will be providing a special exhibition in New York City (see pg. ii for details). I hope all these new features, plus our regular features, will prove to be bidding aids so that you can carefully select a few Choice coins for your collection.

If I can be of any personal assistance, please contact me.

Sincerely yours,

Lee J. Bellisario, President
New England Rare Coin Auctions, Inc.

PERSONALIZED SERVICE

Our bidders mean more to us than just names in a computer memory bank. Our mail bid system and our unique Personal Bidding Service assure you of careful, individualized attention.

55	1835	CHOICE BRILLIANT UNCIRCULATED–60 to 65, with at least 75% original mint red. Fully struck. One small discoloration area on the reverse at 12 o'clock. Otherwise, a Gem. (see color photo)
56	1837	Token, as listed on Pg. 65 of Guide Book. EXTREMELY FINE–45, and Choice. Very popular.
57	1853	ALMOST UNCIRCULATED–50 to 55, lustrous brown.

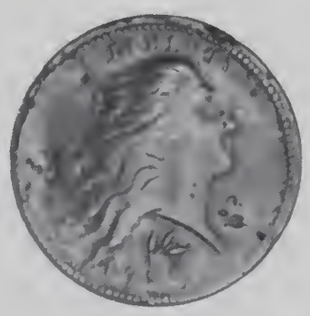
59	1856	CHOICE BRILLIANT UNCIRCULATED–60 to 65, original red and brown coloration. A trifle softly struck as usual, but otherwise very close to full MS-65 quality.

LARGE CENTS

60	1793	Chain, AMERICA, S-4. VERY GOOD-8, although the date is a trifle weak. A few minor surface marks, but still very Choice for the grade.
61	1793	Wreath, Vine and Bars, S-11a. FINE–12, pleasing dark brown with a few normal surface and edge marks.



62	1793	Wreath, Lettered Edge, Double Leaf, S-11b, R-5. FINE–12, with heavy obverse pitting and retooled in the hair to resemble a higher grade.
63	1793	Wreath, Lettered Edge, Single Leaf, S-11c. ABOUT GOOD–3, dark brown color with a few minor planchet flakes. Still well above average quality for the grade.

64 1793 Liberty Cap, S-13. FINE–12 or better details, slightly granular with a few minor surface and edge marks. Expertly retooled in the centers, and overall a very attractive coin in spite of its problems. (PHOTO)

65 1793 Liberty Cap, S-13. Purchased from Stack's May 1975 sale where described: *"Two beads over "I". VIRTUALLY UNCIRCULATED. (Described as Uncirculated in the French catalog.) Interesting and unusual yellow tan mixed with reddish iridescence from mint red. Excellent strike and probably the sharpest 1793 Liberty Cap Large Cent. Faintly proof-like surfaces which are virtually flawless. Splendid obverse and reverse centering, full beaded borders. One of 2 or 3 finest, and POSSIBLY THE FINEST KNOWN. In any event a great rarity in this condition. From the famous Dr. French Collection (lot 15), T. James Clarke, J.H. Payne, Dr. William H. Sheldon, Dorothy I. Paschal."* It realized $16,000 in that sale. Subsequent pedigree: William Grayson to Larry Whitlow, who writes: *"As you will note in the Stack's "write-up" the term, "Interesting and unusual yellow tan. . . ." I found the color to be an unnatural color and decided to "strip" the coin and retone it to a natural brown color (after much deliberation). Much to my chagrin, after the coin was stripped, we discovered that someone had expertly "resurfaced" the coin, apparently many, many years ago. This resurfacing had gone undetected by everyone for decades! The coin is now a natural brown color, but has lost some of it's original sharpness and the surfaces exhibit a very slight porosity. For better or for worse, this is the story. . ."* We now catalog this specimen as ALMOST UNCIRCULATED–50, with a natural attractive brown appearance. Still easily one of the very finest Liberty Cap Cents in existence, and still worth a good percentage of the price it realized in 1975. (see color photo)

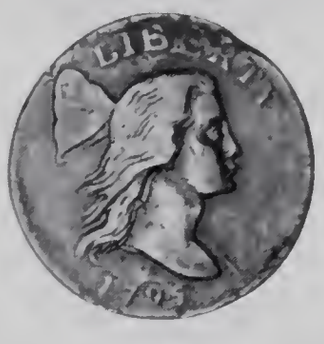
66 1794 S-28, EXTREMELY FINE–40, glossy and exceptionally Choice. LIBE is a trifle weak, but otherwise it may have claims to a higher grade.

67 1794 Head of 1794, VERY FINE–25, dark and slightly granular.

68 1794 Head of 1794, S-49. VERY FINE–25, Choice color with only minor granularity.

69 1795 Lettered Edge, ALMOST UNCIRCULATED–55, Choice strike and color. A few light surface abrasions on the obverse.

70 1795 Plain Edge, ALMOST UNCIRCULATED–50, sharply struck and Choice. Beautiful, slightly mottled even brown coloration.



71 1795 Jefferson Head, FINE–12, or thereabouts. But apparently retooled lightly in the hair to resemble a higher grade. Dark brown surfaces, with some light corrosion pitting on both sides.

72 1796 Third Reverse, BROWN UNCIRCULATED–60, glossy and faintly Prooflike. Typical hoard specimen with some softness of strike and light kegmarks in the centers. Still a very desirable Draped Bust Cent.

73 1797 Third Reverse, Stems. EXTREMELY FINE–45, glossy and Choice with razor sharp details. A few trivial kegmarks and a tiny obverse edge nick at 7 o'clock.

74 1798 Third Reverse, First Hair. EXTREMELY FINE–40, Choice. Beautiful light even brown.

75 1799/8 S-188, R-5. VERY GOOD–10, dark and slightly granular.

76 1799 Normal Date, S-189. FINE–15 details, with claims to VF grade. Some light corrosion pitting on both sides.

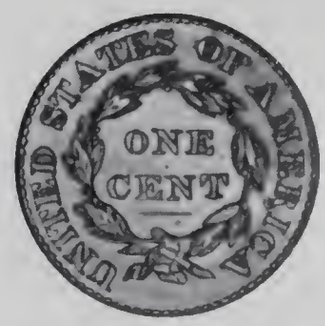
77 1803 Small Date, Large Fraction. EXTREMELY FINE–40 to 45, Choice color. A few small edge abrasions.

78 1804 VERY GOOD–8, dark surfaces. Scarce.

79 1804 FINE–15, granular surfaces.

80	1805	CHOICE ALMOST UNCIRCULATED–55 to 60, flawless, even glossy brown surfaces.
81	1809	VERY GOOD–8, rare.
82	1810	VERY FINE–20, attractive.
83	1811	VERY FINE–25, dark brown. A few small surface and edge marks. Scarce.
84	1814	Crosslet 4, EXTREMELY FINE–40, possibly recolored long ago. Choice.
85	1817	13 Stars, ALMOST UNCIRCULATED–50 to 55, lustrous. Choice.
86	1818	ALMOST UNCIRCULATED–55, lustrous. Small nick in reverse field.

87	1820	GEM BRILLIANT UNCIRCULATED–65, a gorgeous coin with full fiery original mint red. Fully struck and nearly superb! Outstanding quality, worthy of a premium bid.
88	1823/2	VERY FINE–35, very scarce.



89	1825	Large A's, N-9a. CHOICE UNCIRCULATED–60 to 65, lovely lustrous brown, nearly flawless surfaces and a good strike. A greatly undervalued date with auction records well into four figures.

90 1827 No Crumbling Under Nose, N-11a. CHOICE UNCIRCULATED–60 to 65, lustrous brown with traces of mint color. An exceptional 1827 Cent.

91 1833 GEM UNCIRCULATED–65, fully struck with incredibly lustrous brown surfaces. A jewel!

RESULTS: THE ONLY THING THAT REALLY MATTERS

When you decide to sell your collection of rare coins, there is only one thing that really matters . . . results! This is not just the prices realized. Many auction houses have a high return rate. The final check that is presented to the consignor is what counts.

We invite you to compare our prices realized with those of other auction firms. But more important, keep in mind that our prices realized are not "reserve bids," and less than 1% of all lots sold are returned (less than ½ of 1% by dollar volume).

Our competitive commission rates, liberal cash advances and fast, accurate settlement mean that your estate or collection is fairly and conveniently transformed into cash. Call us today for full details on how we can help you sell your collection.

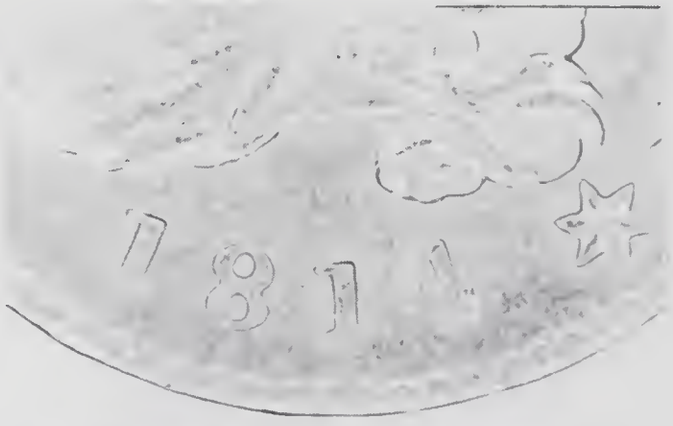
BUST DIMES



446 1814 Small Date, CHOICE BRILLIANT UNCIRCULATED–60 to 65, lustrous and quite well struck for the variety. Scott's lists it as "Excessively rare in Unc, traditionally underrated in all grades" and prices it at nearly double the Large Date valuation.

FINEST KNOWN 1822 10¢

448 1822 GEM BRILLIANT UNCIRCULATED–65 to 70, superb! A needle sharp strike with full blazing original mint frost. One of the most underrated of all U.S. Silver coins. Most of the reported 100,000 mintage were actually dated 1821. While "sliders" occasionally enter the market, we have never seen nor heard of another truly Choice Mint State specimen. This represents a truly once-in-a-lifetime opportunity to acquire a classic American rarity in the finest possible condition.

449 1827 EXTREMELY FINE–40, beautiful rainbow toning.

NOT JUST GRADING, BUT GRADING YOU CAN TRUST

In some auctions, mail bidders consistently submit very low bids to protect themselves from overpaying for overgraded coins. We have made sure this will never happen at our sales because accurate and consistent grading and full mention of defects has been the foundation of all our auctions. This is an advantage to the buyers as well as to the consignors of rare and choice coins.

The buyers have the assurance that they're bidding on a properly described coin. The coins they receive are exactly as the catalog led them to expect and their bids reflect their confidence in us.

The consignors receive the best possible results, not only in higher prices realized, but in a more prompt and efficient disposition of their collections as well. In our last auction, our return rate to consignors was less than 1% by number of lots; less than ½ of 1% in dollar volume.

450 1827 Virtually UNCIRCULATED–60, with beautiful lustre, toning and strike. Only the barest trace of friction on the obverse separates this coin from "Gem Unc-65" quality. A beautiful Large Size Bust Dime.

451 1829 Small 10¢, ALMOST UNCIRCULATED–55, attractive violet and steel gray toning. Somewhat Prooflike on the obverse.

452 1830/29 EXTREMELY FINE–45, scarce.

MS-70 1831

453 1831 GEM UNCIRCULATED–70, superb and flawless. Every so often, we catalogue a coin as MS-70, but these are few and far between. Here is such a coin, beautifully preserved with no discernible marks. Fantastic lustre beneath beautiful iridescent sea green, violet and golden toning. An incredible coin for the numismatist who wants the very best quality, and is willing to pay the price. (see color photo)

CHECK YOUR BID SHEET BEFORE MAILING

Have you ever transposed the digits in a set of numbers? No matter how often you work with numbers, errors do occur. So check that bid sheet carefully and keep a copy for your records.

RESULTS: THE ONLY THING THAT REALLY MATTERS

When you decide to sell your collection of rare coins, there is only one thing that really matters . . . results! This is not just the prices realized. Many auction houses have a high return rate. The final check that is presented to the consignor is what counts.

We invite you to compare our prices realized with those of other auction firms. But more important, keep in mind that our prices realized are not "reserve bids," and less than 1% of all lots sold are returned (less than ½ of 1% by dollar volume).

Our competitive commission rates, liberal cash advances and fast, accurate settlement mean that your estate or collection is fairly and conveniently transformed into cash. Call us today for full details on how we can help you sell your collection.

HAVE YOUR OWN PERSONAL BIDDER WORK FOR YOU

If you're unable to join us for the sale of the A.J. Amato Collection, do the next best thing – have one of our qualified auction bidder-representatives bid for you. He will attend our auction in person and:

1. Examine the lots you wish to bid on and determine their suitability for *your* collection according to *your* standards.
2. Give you complete and professional bidding advice.
3. Execute your bid up to the amount you and he have previously agreed upon.
4. He will do this for a nominal fee (usually 5%) based upon the actual price you pay for the coin.

You pay nothing if you are an unsuccessful bidder. Look for further details at the beginning of this catalog.

WHAT IS AN UNRESERVED AUCTION?

This is an unreserved mail and floor bid auction. All coins will be sold to the highest bidder, unreserved. NOT JUST GRADING, BUT GRADING YOU CAN TRUST

In some auctions, mail bidders consistently submit very low bids to protect themselves from overpaying for overgraded coins. We have made sure this will never happen at our sales because accurate and consistent grading and full mention of defects has been the foundation of all our auctions. This is an advantage to the buyers as well as to the consignors of rare and choice coins.

The buyers have the assurance that they're bidding on a properly described coin. The coins they receive are exactly as the catalog led them to expect and their bids reflect their confidence in us.

The consignors receive the best possible results, not only in higher prices realized, but in a more prompt and efficient disposition of their collections as well. In our last auction, our return rate to consignors was less than 1% by number of lots; less than ½ of 1% in dollar volume

SCARCE CROSS SIGNATURE NOTE

835 $10 1915, Federal Reserve Note, KANSAS CITY. F-817a, Teehee-Burke. Scarce variety with Cross-Miller signatures hand signed and Cross as Acting Secretary. CRISP UNCIRCULATED, light yellowing.

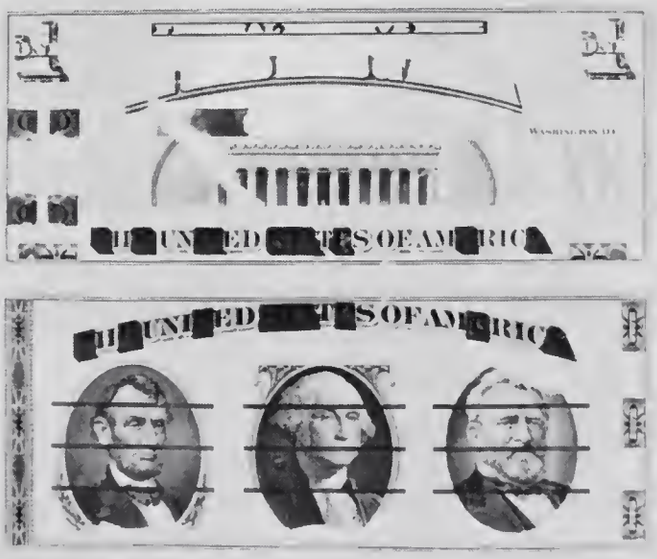
842 $20 1906, Gold Certificate. F-1185, Parker-Burke. A CRISP ALMOST UNCIRCULATED note with light vertical fold. Vivid colors with even borders.

CURRENCY ERRORS

843 $1 1935-E, Silver Certificate. An interesting note with over 30% of the front printing missing, as a result of it being folded during the initial printing process. The sheet was then unfolded, then the serial numbers, seal and signatures were printed. The result is that the bottom left serial number and the treasurer's signature appear in the open unprinted area. A FINE note with moderate to heavy soiling.

844 $20 1974, Federal Reserve Note. A CRISP ALMOST UNCIRCULATED note with the reverse totally unprinted!

TEST NOTES



845 Uncut pair of uniface test notes. Unlike the German test notes, which were adopted, these portray Washington in the center rather than Jefferson. The obvious board breaks resulted in this form being rejected by the B.E.P. CRISP ALMOST UNCIRCULATED due to slight mishandling.

NOT JUST GRADING, BUT GRADING YOU CAN TRUST

In some auctions, mail bidders consistently submit very low bids to protect themselves from overpaying for overgraded coins. We have made sure this will never happen at our sales because accurate and consistent grading and full mention of defects has been the foundation of all our auctions. This is an advantage to the buyers as well as to the consignors of rare and choice coins.

The buyers have the assurance that they're bidding on a properly described coin. The coins they receive are exactly as the catalog led them to expect and their bids reflect their confidence in us.

The consignors receive the best possible results, not only in higher prices realized, but in a more prompt and efficient disposition of their collections as well. In our last auction, our return rate to consignors was less than 1% by number of lots; less than ½ of 1% in dollar volume.

One of the rarest and most coveted of all U.S. Patterns. (see color photo)

NOT JUST GRADING, BUT GRADING YOU CAN TRUST

In some auctions, mail bidders consistently submit very low bids to protect themselves from overpaying for overgraded coins. We have made sure this will never happen at our sales because accurate and consistent grading and full mention of defects has been the foundation of all our auctions. This is an advantage to the buyers as well as to the consignors of rare and choice coins.

The buyers have the assurance that they're bidding on a properly described coin. The coins they receive are exactly as the catalog led them to expect and their bids reflect their confidence in us.

The consignors receive the best possible results, not only in higher prices realized, but in a more prompt and efficient disposition of their collections as well. In our last auction, our return rate to consignors was less than 1% by number of lots; less than ½ of 1% in dollar volume.

RESULTS: THE ONLY THING THAT REALLY MATTERS

When you decide to sell your collection of rare coins, there is only one thing that really matters . . . results! This is not just the prices realized. Many auction houses have a high return rate. The final check that is presented to the consignor is what counts.

We invite you to compare our prices realized with those of other auction firms. But more important, keep in mind that our prices realized are not "reserve bids," and less than 1% of all lots sold are returned (less than ½ of 1% by dollar volume).

Our competitive commission rates, liberal cash advances and fast, accurate settlement mean that your estate or collection is fairly and conveniently transformed into cash. Call us today for full details on how we can help you sell your collection.

NEARLY MS-70 HIGH RELIEF

1506 1907 High Relief, Roman Numerals (MCMVII), Wire Edge. GEM BRILLIANT UNCIRCULATED–65 to 70, superb! A virtual MS-70 coin with essentially no bag marks or imperfections of any kind. This Ad Answers Two Important Questions.

Question 1. Why invest in rare coins?

Very simply, because a demonstrated growth rate of 59% per year for the last five years on a representative portfolio of uncirculated coins is pretty hard to beat in any of the traditional investment media. **And**, this 59% per year appreciation rate is just for the highest mintage "type" coins, as listed in **The Guidebook of United States Coins**, and doesn't include statistics for the better quality, rarer coins.

Current uncertain economic conditions are driving many investors to seek more secure, lucrative alternatives to the stock market and commodities exchanges, and many professional financial advisors are finding that rare coins are an extremely attractive alternative. Rare coins are "the number one hedge against inflation," according to Franz Pick (BARRON'S). D. Reginald Tibbetts of AMERICAN COLLECTOR believes that "coins, especially rare coins, generally outperform other types of investments and a collector has the tangible joys of gathering and admiring a coin collection. Coins do well in recessions and inflationary periods." Max Liebler of Shearson Hayden Stone, writing in COMMODITIES magazine noted that, "in many instances, investing in good rare coins has been found to have a greater profit return potential than investing in gold bars or modern issue gold coins."

Largely in response to the pervasive disillusionment with the future of stocks and bonds, the coin market is presently experiencing one of the most incredible booms in its history. As more and more investors enter the market, the market gets stronger and stronger — and this trend is, we feel, likely to continue for quite some time.

With the decline of the dollar on the international market, and erratic economic conditions at home, think about the precarious behavior of your stock market investments. And consider how the 6% yearly inflation rate is affecting your savings account. It's no wonder that a 59% per year appreciation rate has made rare coins one of the most popular alternative investment media.
